

Ioannis Kleftogiannis

Frontend Engineer • React Specialist • System Designer

✉ kleftojohn@gmail.com • 🌐 kleftogiannis.com • 💼 [LinkedIn](#) • 🖥️ [GitHub](#)

Summary

Frontend Engineer with 3+ years of experience delivering scalable applications across fintech, gaming, and healthcare domains. Experienced in designing frontend architecture, improving developer workflows, and aligning technical efforts with business needs. Skilled in performance optimization, CI/CD, and integrating backend services into responsive interfaces. Currently working on enterprise-grade telecom solutions with a strong focus on system design and development efficiency.

Core Skills

Languages & Frameworks: JavaScript (ES6+), TypeScript, React, React Native, HTML5, CSS3, Node.js

Tools & Libraries: Redux, Zustand, Cypress, Jest, Bootstrap, Material UI, Tailwind

DevOps & CI/CD: GitHub, Gitlab, Docker (basics), Vite/Webpack, Jira

Databases: PostgreSQL, MongoDB, MySQL

Other: System design, AI-assisted development (Cursor, ChatGPT), Agile/Scrum

Professional Experience

Front End Engineer

Cognity — Jun 2025 – Present

- Leading frontend development for enterprise projects in the public service sector, focused on performance, scalability, and accessibility.
- Designing and implementing reusable UI systems using React and TypeScript.
- Collaborating with cross-functional teams to translate complex business logic into clean, maintainable interfaces.
- Contributing to system architecture and CI/CD pipelines to improve deployment speed and code quality.
- Leveraged AI tooling to accelerate boilerplate tasks and focus on architecture and higher-level decisions.

Front End Developer

OKTO (Fintech, Payments) — Jul 2023 – Mar 2025

- Worked across multiple projects including payment platforms (OKTO.Direct, OKTO.Cash), collaborating with team members to implement secure and responsive frontend systems.
- Developed reusable UI components and implemented state management using Redux and Context API.
- Optimized rendering strategies through lazy loading and memoization to improve app performance.
- Coordinated with backend, product, and design teams to ensure business requirements and compliance standards (PCI DSS) were met.

Front End Developer

ARHS Developments Hellas — Aug 2022 – Mar 2023

- Built cross-platform apps (React.js, React Native) for pharmaceutical industry clients.
- Focused on accessibility, performance, and UI/UX feedback integration.
- Designed scalable frontend logic and coordinated with backend teams on integrations.

Full Stack Developer

Solutionist — Apr 2022 – Jun 2022

- Developed UI components for climate data visualization and gaming administration platforms.
- Optimized performance, ensured responsive design, and collaborated with research stakeholders.

Education

Athens University of Economics and Business — Bachelor of Statistics (in progress)

Relevant coursework: Python, Java, SQL, Data Analysis

Languages

- English (Fluent)
- German (B2)

Personal Development

- Currently expanding backend skills (Node.js, REST APIs, auth flows)
- Enjoys exploring AI-assisted coding, working out, and overthinking code quality

Military obligations not fulfilled
